ETHANOL

Fire is beautiful and also dangerous if not handled properly. Please have a qualified gas fitter setup and install this product according to local codes.

This product has been tested and certified as being safe, as long as these **minimum clearances** to adjacent materials are maintained.

Alcohol based fuels can be used indoors **WITH CAUTION**. As alcohol fuel is burned, oxygen is consumed, make sure there is adequate air supply to room. Deaths have resulted from asphyxiation (no breathable air).

OPEN A DOOR OR WINDOW WHEN THE APPLIANCE IS IN USE.
